

WasiSoft Technology

Complete IT Solution

Company Profile

About us.

WasiSoft Technology is a IT consultant company with over 9 years of experience. We are a software development partner to some of the most amazing world tech companies. We also form partnerships in a very unique way, by building dedicated cross-functional teams of product experts that are solely committed to one single client instead of sets of tasks per project. This increases commitment level, efficiency and streamlines all the efforts towards the same business goal.

Our partners not only enjoy working with an experienced team of high-quality engineers, system administrator designers, product managers but they do so in a way that Kroon becomes an extension of their team. The results of such operating model are just unbeatable. The outcome of this kind of relationship results in both amazing development achievements, connections and high level of commitment established between the teams and the product.

We look forward to meeting you and truly working together on the next big thing.
